

WAN.2019 Pioneer Career Academy (Neb City) Q&A

Q1: We can provide 10Gig leased-lit fiber connectivity. If our proposal does not include dark fiber pairs (indicated for maintenance in the RFP), would that disqualify our proposal? We can provide leased-lit, but not dark fiber.

A1: One option in the RFP allows for a proposal for leased lit 10Gig fiber. You do not need to submit dark fiber as part of your proposal.

Q2: The RFPs appear to request dark fiber OR leased-lit fiber. Is it correct to assume by the reference to “leased-lit” indicates the request is for dark fiber plus respective optics and switches to provide light over the fiber and respective strands?

A2: The leased lit proposals would include dark fiber plus the specified optics.

Q3: Would the requestor consider a full Ethernet solution?

A3: A full ethernet solution is not specified in any portion of the RFP so it would not be considered.
